Hey Brianna,

I am emailing to let you take a look at what we have done so far with the project. What we have at this point is we have digitized some sample data and implemented into a database. The files I am attaching are to show you that we do have a functional database at this point in time. What I need is just for you to look through what we have done so far and reply with you letting us know two things. If you approve our iteration 1 project milestone, and another line saying if you approve our iteration 2 project proposal.

Thanks,
Abdul Shaikh

Approved of iteration 1 project milestone.

Approve the iteration 2 project proposal.

It looks awesome Thanks!
